OPERATION AND EFFECTS OF THE GENERALIZED SYSTEM OF PREFERENCES

Scheme of the European Economic Community: 1989

Note by the UNCTAD secretariat

1. The present document contains information drawn from published sources on the operation of the Scheme of the EEC in 1989.[1/] It relates to the application of Community ceilings and quotas for individual beneficiaries. Subsequent information will be published as it becomes available.

2. During 1989, 76 products were affected by individual tariff ceilings, consisting mostly of chemical and petrochemical products, leather products, footwear, umbrellas, ceramic tableware, statuettes, glass inners for vacuum flasks, records, taps, reception apparatus, mounted piezzo-electric crystals, clocks, other toys[2/] textiles and clothing.[3/] Furthermore, a total of 71 sensitive products were affected by tariff quotas and/or Fixed Duty Free Amount (FDFA). It should be noted that 12 among these sensitive products were also affected by the tariff ceiling mentioned above. Sensitive products affected were: preserved pineapples; chemical and petrochemical products; "dropped" furskins; fibreboard of wood; plywood; footwear; glazed ceramic flags and paving; pliers; pincers; handtools; padlocks and locks· pumps and compressors; sewing machines; records; tapes; electrical capacitors; clocks; festival articles; shaving brushes; travel goods of leather; articles of apparel and clothing; accessories; gloves; semifinished products of iron and steel; other wood; screws; aluminium wire; television receivers; and textile products.[4/]

3. In addition eight non-sensitive products were also affected by limitations, (i.e., zinc oxide; chlorides of aluminium; maleic anhydride; quinine; artificial flowers; articles of jewellery; nuts of iron and steel; and aluminimum plates, sheets and strip[5/]).

4. With the exception of 10 products, all the above mentioned products, for the remainder of the year, had normal MFN rates re-established for imports from all beneficiaries (in the case of two products) and from single countries concerned for the remaining products.

5. Of the 10 products mentioned above six have been excluded definitely from preferences when imported from Saudi Arabia, which is considered as an "ultra-competitive supplier". The four other products have been excluded definitively from preferences within the "new phase of differentiation " when imported from Brazil.

6. The limitations were applied as follows: all beneficiaries (2 products); China (52 products); Brazil (25 products); India (20 products); Pakistan and Thailand (17 products each); Hong Kong (13 products); Indonesia (11 products); Malaysia (9 products); Mexico (8 products); Romania (7 products) Singapore (6 products) Philippines (5 products); Venezuela (2 products); Argentina, Bahrain, Colombia, Kuwait and Saudi Arabia (one product each).

7. Various Official Journals of the European Communities, series C of 1989, provided information on preferential trade which reached tariff ceilings vis-à-vis specific beneficiaries but information on whether or not MFN rates were established was not provided. This was the case of 43 industrial products affecting 22 beneficiaries and 83 textile products affecting 19 beneficiaries.6/

8. Further details of imports which reached quotas/ceilings or FDFA in 1989 can be found in the attached tables.
